

Comments from John Zicconi on S.280, Section 1

My only comment is that the MV Arbitration Board requested this change and fully supports it as the language clears up some ambiguous and conflicting language within the statute. This change will be good for consumers as the current ambiguity could only cause them potential problems. If the chair would like me to testify I'm happy to. But if the committee is OK with simply signing off on what the Board considers a technical correction I'm good with that too. Just let me know.
